

Oil Field Environmental Incident Summary

Incident: 20140315092840 **Date/Time of Notice:** 03/15/2014 09:28

Responsible Party: CONOCOPHILLIPS COMPANY

Well Operator: CONOCOPHILLIPS COMPANY

Well Name: DICKINSON-LODGEPOLE UNIT 79

Field Name: DICKINSON

Well File #: 13554

Date Incident: 3/14/2014 **Time Incident:** 08:00

Facility ID Number:

County: STARK

Twp: 140 **Rng:** 96 **Sec:** 31 **Qtr:** NW NE

Location Description: On the Produced water pipeline right of way approximately 1/4 mile from Roers apartment complex. The general land use is pipeline right of way. GPS COORDINATES: Lat- 46.8979645 long 102.8354797

Submitted By: Lewis Schoenberger

Received By:

Contact Person: Lewis Schoenberger
PO BOX 358
BORGER, TX 79008-0358

General Land Use: Other - Described Above

Affected Medium: Topsoil

Distance Nearest Occupied Building: 0.3 Mile

Distance Nearest Water Well: 0.3 Mile

Type of Incident Pipeline Leak

Release Contained in Dike Yes - On Pipeline ROW

Reported to NRC: No

	Spilled	Units	Recovered	Units	Followup	Units
Oil						
Brine	8	Barrels				
Other						

Description of Other Released Contaminant:

Inspected:

Written Report Received:

Clean Up Concluded:

Risk Evaluation:

None

Areal Extent:

approximatel 20 yards by 20 yards

Potential Environmental Impacts:

The spill is contained on the right of way

Action Taken or Planned:

The produced water impacted spill debris will be removed for appropriate disposal.

Wastes Disposal Location: This has yet to be determined

Agencies Involved:**Updates**

Date: 3/17/2014 **Status:** Reviewed; Followup Required **Staff:** Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

According to the incident summary, this spill impacted areas along a pipeline right-of-way. Followup is necessary.

Date: 3/21/2014 **Status:** Inspected; More Followup Required **Staff:** Espe, Brady

Updated Other Contaminant

Notes:

I arrived at the site. Temperature was 15 °F, with wind from the northwest at 20 mph. The pipeline break occurred on the north side of the road going to farmsteads and well. This road goes west from main road and just north of the new road for the apartment complex. The pipeline has been repaired, and the excavated soil was hauled away. There is still a hole in the place it was repaired; not sure if they need more soil removal or new soil. Called company contact on report; he was not sure why the hole was still open. He indicated that he would call the area maintenance supervisor about the situation. More followup is needed this summer to check on vegetative growth.

Date: 4/24/2014 **Status:** Inspected; More Followup Required **Staff:** Espe, Brady

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

The weather was 42 °F, clear, with wind from the northwest 0-5 miles per hour. The excavation pit has been filled in, and the area has been re-graded. More followup later this summer to check on vegetative growth.

Date: 8/11/2014 **Status:** Inspected **Staff:** Espe, Brady

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

The weather was 81°F, clear, with wind from the southeast 5 mph. The 10- X 10-foot area of the repair has nothing growing. This area appears to have not been reseeded. The soil has the same appearance as the soil in the hay field in the immediate area. No further followup needed at this time.

Date: 7/21/2014 **Status:** Inspected **Staff:** Espe, Brady

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

The weather was 86°F; cloudy, with wind from the northwest 10-15 mph. The alfalfa field has been harvested; orange cones have been placed around the area of the break. This spot is not vegetated and does not appear to have been seeded. This area is not close to any surface water. I called company contact on the site. More followup will be done in the near future.
